WINNEBAGOCONNECT™

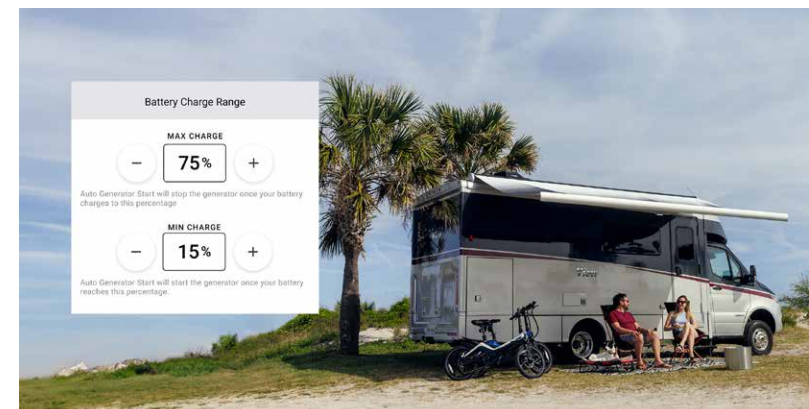

NEW TECH THAT WORKS FOR YOU.

Part co-pilot, part concierge. Winnebago Connect is a first-of-its-kind, intelligent RV platform empowered with intuitive control that proactively manages on-board systems according to your preferences.

From smart energy optimization and one-touch settings to real-time pet monitoring and over-the-air software updates, Winnebago Connect simplifies vehicle operations at every turn and notifies you as needed to deliver a more elevated experience.

Because what's the point of next-level connectivity if it doesn't help you truly unplug?

Intelligent + Intuitive

Unlike other “smart” RV platforms that simply transplant controls to your mobile device, Winnebago Connect’s unrivaled technology actively monitors and intuitively controls your RV systems and features according to your preferences - silently, efficiently and automatically.

On-the-Go Upgrades

Remote diagnostics can help speed service, while over-the-air software upgrades automatically enhance your RV systems as updates become available – without heading to the dealer. And that’s just the beginning.

Pet Minder

Winnebago Connect keeps a close eye on all vehicle systems, so you can stay focused on the adventure. It even helps you stay aware of your four-legged friend’s climate when they’re alone in the RV and notify you as needed.

At Your Service Anywhere

Winnebago Connect integrates seamlessly with the Winnebago app to make RV operations and maintenance more convenient than ever. Like a proactive assistant, it also keeps you in the know with smart messaging and timely alerts.
